

A Who keeps which half of Jackson's concurrence

Each case compares its own majority against its own dissent, so subject matter, era and vocabulary cancel. Red = the majority leans to the three categories.

n = 20 presidential-power cases, 1977–2024, in which the Court divided and both opinions run to at least ten paragraphs. Δ is a difference-in-differences in cosine similarity to the 38 main-text paragraphs of Jackson's concurrence, double-centred within each case. Sign test p = .006; Wilcoxon p = .002.

B Placebo test

Jackson's paragraphs split at random into same-sized groups, 4,000 times. The real split is not arbitrary.
